Patient Readmission Analysis Planning

- Raw Data from the Excel
- Data Source

- Data study and inspection
- Understanding the dataset and convert it into CSV format

- Using of the Snowflake to manipulate my data
- Data Warehouse

- Exporting of the manipulated data
- I will export the manipulated data from Snowflake into CSV

- I'll using Excel to pivoted the exported data for analysing and visual
- Data Analysing and Visualizing

- Data Presentation
- I'll use Canva to visualise the final report
